

## CB4N IP66 RCD/MCB WEATHERPROOF ENCLOSURE

### **Application**

The CB4N IP66 Distribution enclosure is used to fit MCB / RCD for solar panel. The base mounted mechanism provides an adjustable din rail for different height type of MCB and RCD. Easy Termination and more wiring space, as well as good design for the waterproof gasket ensure the IP66 rating.

### **Material**

Polycarbonate flame retardant with UV protect, high resistance ensure that the enclosure body has good quality and long using life.

### **Key Features**

- IP66 Rating, can be used in humid and dusty environments for outdoor.
- Suitable for MCB/ RCD in solar project, also suitable for our DC isolator(HGN4-002GL HGN4-003GL)
- Higher intensity and more durable
- Nice design, good quality
- Lockable cover
- M25 \* 4 Knockout
- Good gasket design ensures IP66 rating
- 4 X M25 Knockout

### **Technical Data**

- |                              |                                       |
|------------------------------|---------------------------------------|
| • Part Number                | CB4N                                  |
| • IP Rating                  | IP66                                  |
| • Color Light                | Grey                                  |
| • Enclosure Material         | Polycarbonate                         |
| • UV Resistant               | Yes                                   |
| • Fixing Screws              | Stainless Steel                       |
| • Pad lockable               | Yes                                   |
| • Insulation Class           | II                                    |
| • Insulation Voltage Ratings | 1200VDC                               |
| • Installation Temperature   | -5 - +60 °C                           |
| • Uses                       | Electronic Equipment, AC & DC MCB RCD |
